The global ECG Data Management Software market size is predicted to grow from US\$ 1188 million in 2025 to US\$ 1983 million in 2032; it is expected to grow at a CAGR of 7.6% from 2026 to 2032.

ECG Data Management Software is a professional medical digital tool designed to collect, store, process, analyze and manage electrocardiogram (ECG) data generated by medical devices. It integrates core functions including ECG data import/export, real-time monitoring, data sorting, abnormal signal identification, report generation and data archiving, compatible with various ECG detection equipment such as dynamic ECG monitors and resting ECG machines. The software standardizes the management of ECG data, ensures the integrity and accuracy of data, facilitates medical staff to quickly review, compare and analyze patient ECG information, supports clinical diagnosis, treatment follow-up and medical research, and serves as an essential auxiliary tool for medical institutions in cardiovascular disease diagnosis and management.

With the increasing incidence of cardiovascular diseases and the continuous advancement of medical digitalization, the demand for professional ECG data management tools in medical institutions is growing steadily. Hospitals, clinics, cardiovascular specialty institutions, and medical research centers all need such software to solve the problems of scattered ECG data, cumbersome manual sorting, and difficult data traceability. The emphasis on precise medical treatment and personalized diagnosis further drives the demand for software that can realize intelligent analysis of ECG data and assist in early warning of abnormal signals. Additionally, the popularization of remote medical services and the need for centralized management of patient ECG data across departments and institutions have expanded the application scenarios of the software, creating broad business opportunities for providers that offer

user-friendly, compliant, and scalable ECG data management solutions tailored to the needs of medical institutions.
