The global Edge Computing in Manufacturing market size is predicted to grow from US\$ 2698 million in 2025 to US\$ 16910 million in 2031; it is expected to grow at a CAGR of 35.8% from 2025 to 2031.

Edge computing refers to the allocation of computing workloads to the “edges” of a network—to devices and resources closer to network endpoints than a centralized data center or cloud. In manufacturing industry, advances in edge computing mean that manufacturing is returning to a decentralized model. Rather than concentrate data processing in a single location, decentralized systems like edge computing take advantage of the compute and storage capacity extant at nodes throughout the network. This type of structure is “decentralized” because computing is done where there are available and sufficient resources. With decentralized systems, proximity is a leading determinant of where processing occurs.

North America is the largest consumption area, making up 42.50% in 2019. Europe ranks the second, total Edge Computing in Manufacturing accounted for 29.55%. Asia Pacific is projected to share significant growth in the edge computing in manufacturing market owing to increasing demand for edge computing in automotive and chemical industry and rapidly growing manufacturing industry market in emerging developing economies like India and China. Of the major players of edge computing in manufacturing, IBM maintained its first place in the ranking in 2019. IBM accounted for 14.98% of global edge computing in manufacturing revenue market share in 2019. Other players accounted for 13.50% and 12.84% including Amazon Web Services, Microsoft. On the basis of product type, the software & services segment is projected to

account for the largest market share during the forecast period; this segment was estimated to account for 65.53% market share in 2019. In the applications, the Electronics segment was estimated to account for the highest market share of 22.93% in 2019. Followed by Automobile & Transportation, which accounted for 19.83%.
