The global Egress Window market size is predicted to grow from US$ 227 million in 2025 to US$ 283 million in 2031; it is expected to grow at a CAGR of 3.7% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Egress Window is a window designed to provide an emergency exit from a building, typically installed in basements or bedrooms to comply with building codes that mandate safe escape routes. These windows must meet specific size and operational criteria to ensure occupants can exit easily and emergency personnel can enter if necessary. Beyond safety, egress windows also allow natural light and ventilation into below-grade spaces, enhancing the livability of basements and other areas. Materials commonly used include vinyl, aluminum, and wood, with glazing options like double-pane or Low-E glass for energy efficiency.

United States market for Egress Window is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
