According to our LPI (LP Information) latest study, the global Elder Care Services market size was valued at US\$ 396200 million in 2023. With growing demand in downstream market, the Elder Care Services is forecast to a readjusted size of US\$ 470630 million by 2030 with a CAGR of 2.5% during review period.

The research report highlights the growth potential of the global Elder Care Services market. Elder Care Services are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Elder Care Services. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Elder Care Services market.

Elder care service providers are continuously growing due to rising number of older patients suffering from disabilities and improving day care facilities. Hence, companies are more focused in wireless connectivity and advanced devices to deliver healthcare services. In order to meet customer needs, elder care service companies are entering into various private care centres because older people tend to choose living in care facilities with specialized services requirements, which are provided in private care centres. Chronic conditions of elderly and preventive care technology are opening up niche markets. Moreover, the driving factor of such day care facilities is the overall cost of the setup, which is comparatively less than hospitalization. The day care facility is provided for 10-12 hours a day and is also expected to fuel elder care services market growth in terms of revenue over the forecast period.

Few factors driving the growth of global elder care services market include increase in healthcare expenditure, increasing adoption of elder home care services, government funding for aged care services and well-developed infrastructure with wide-range of services. Also, rising number of elderly patients suffering from disabilities and high dependency ratio of elderly over younger population is likely to fuel the elder care services market over 2018–2026
