Electric blind rivet nut gun is an electric tool used to quickly and firmly install blind rivet nuts on metal sheets or other hard materials. The device drives the inner core screw to rotate and tighten the nut through a motor, so that the nut can be automatically riveted on the back of the workpiece. It is suitable for 'blind area' connection scenarios that cannot be accessed from the back. Compared with traditional hand tools, electric blind rivet nut guns have higher operating efficiency, more consistent connection quality and more labor-saving advantages. They are widely used in industries such as automobile manufacturing, sheet metal processing, electrical equipment, and home appliance assembly. They are important equipment for improving efficiency and quality in industrial assembly processes.
