Electric Mining Dump Trucks are mechanized vehicles, which are both on-road and off-road transportation mediums in the regions of heavy mining and constructions. These are haul vehicles used to continuously shift the mined and waste materials to refining and dumping grounds, respectively. Instead of using a combustion engine, they use an electric engine for the propulsion and movement of the truck body.

High demand is boosting the growth of the global market. However, high initial cost and complex structure are factors hindering the growth of the market. Furthermore, technological advancements are expected to provide growth opportunities over the forecast period.
