The global Electric Propulsion Satellites market size is predicted to grow from US\$ 151 million in 2025 to US\$ 726 million in 2031; it is expected to grow at a CAGR of 30.0% from 2025 to 2031.

Electric Propulsion (EP) is a class of space propulsion which makes use of electrical power to accelerate a propellant by different possible electrical and/or magnetic means. The use of electrical power enhances the propulsive performances of the EP thrusters compared with conventional chemical thrusters. Unlike chemical systems, electric propulsion requires very little mass to accelerate a spacecraft.

Europe is the largest Electric Propulsion Satellites market with about 40% market share. North America is follower, accounting for about 26% market share. The key manufacturers are ArianeGroup, Busek Co. Inc., SITAEL, Accion Systems Inc., HELMET etc. Top 3 companies occupied about 63% market share.
