An electric saber saw, also known as an electric reciprocating saw, is an electric cutting tool that uses a motor to drive the saw blade to perform reciprocating linear motion. It is widely used in scenes such as building demolition, carpentry, metal pipe cutting, and garden pruning. Its saw blade can be quickly replaced and is suitable for a variety of materials (such as wood, metal, plastic, etc.). It has the characteristics of strong cutting force, flexible operation, and strong penetration. Electric saber saws are usually divided into two types: plug-in type and lithium battery type. Among them, the lithium battery type is becoming more and more popular due to its strong portability. Its blade is slender and its shape is similar to a 'saber', hence the name. It is often regarded as the most maneuverable of multi-purpose cutting tools.
