The electric caulking gun is an electric-driven tool used for applying caulking glue. Seam glue is a kind of glue used to fill the gaps between ceramic tiles, floor tiles and other tiles. It can improve the aesthetics and waterproof performance of tiles. Electric caulking glue guns usually consist of an electric drive device, a glue container, a pressure control device and a nozzle. The user loads the caulking glue into the glue container, pushes the glue to the nozzle through the electric drive device, and then applies the caulking glue evenly into the gaps between the tiles through the nozzle. The electric caulking glue gun has the advantages of fast construction speed, uniform construction effect, and easy operation. It is suitable for large-area caulking construction. Electric caulking glue guns are widely used in decoration, construction and other fields. They can improve construction efficiency, reduce labor costs, and ensure

construction quality.
