The Seated Type Reach Truck is an electric forklift specially designed for indoor warehousing and logistics operations. It is a type of storage forklift. Its core feature is that its mast or fork carriage can move forward and backward along the tracks on the inside of the legs. When the mast moves forward, the cargo forks can extend beyond the front wheels to pick up and place goods, enabling efficient operations even in narrow spaces or near the edges of shelves. After completing the operation, the mast and the lifting mechanism can be retracted to keep the center of gravity of the goods within the support surface and ensure the stability of the forklift when driving.

The global Electric Seated Reach Truck market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
