The global Electric Underfloor Heating Mats market size is predicted to grow from US$ 936 million in 2025 to US$ 1291 million in 2031; it is expected to grow at a CAGR of 5.5% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Electric Underfloor Heating Mats is an electric heating system that can be installed under the floor (such as tiles, stones or wooden floors) of a specific room to evenly heat the space in a radiant manner so that the heat is distributed throughout the space, providing a comfortable and energy-saving indoor heating solution. This floor heating mat is easy to install, heats up quickly and supports intelligent temperature control. It is suitable for residential, bathroom and commercial places, combining safety, high efficiency and space saving advantages.

The global electric underfloor heating mats market has been steadily expanding with the growth of smart home and energy-saving heating demand. The core driving factors include the upgrading of residential heating in cold regions (such as Northern Europe, North America and northern China), the improvement of comfort demand in commercial places (hotels, gyms), and the government's policy support for electric heating energy efficiency standards (the EU's 'carbon neutrality' goal promotes the popularization of clean heating). Market competition is polarized: international brands (Danfoss, Nexans) dominate the high-end market, focusing on high-temperature resistant and low-energy carbon fiber products; Chinese manufacturers (Anze, Nuanboshi) seize the low-end market with cost-effective floor heating pads and accelerate penetration through e-
