The electrical fire protection current limiting protector overcomes the problems of traditional circuit breakers, such as long short-circuit current cutoff time, large short-circuit current, large arc sparks, and short service life. When a short-circuit fault occurs, current limiting protection can be achieved at a speed of microseconds to avoid dangerous sparks. It greatly improves the monitoring capability of electrical fires and significantly reduces the occurrence of electrical fire accidents. This protector is suitable for places with strict requirements on fire safety in crowded places such as schools, hospitals, shopping malls, factories, nursing homes, warehouses, etc.

The global Electrical Fire Protection Current Limiting Protector market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
