The global Electrical Surge Protector market size is predicted to grow from US\$ 294 million in 2025 to US\$ 419 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

Electrical Surge Protectors are designed to protect against transient surge conditions. Large single surge events, such as lightning, can reach hundreds of thousands of volts and can cause immediate or intermittent equipment failure. However, lightning and utility power anomalies only account for 20% of transient surges. The remaining 80% of surge activity is produced internally. Although these surges may be smaller in magnitude, they occur more frequently and with continuous exposure can degrade sensitive electronic equipment within the facility.

United States market for Electrical Surge Protector is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
