Epoxies are “go to materials” for Electrically Insulative Adhesives with high dielectric strength, low dielectric constants, high volume resistivity and a low dissipation factor. The ultimate electrical insulation numbers depend upon the resin, hardener and, in certain cases, fillers in order to achieve the desired properties. Curing agents are particularly significant in this regard, with the major ones being aliphatic amines, polyamides, cycloaliphatic amines, aromatic amines, anhydrides, lewis acids and imidazoles.
