Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Electro-mechanical Brake market.

Electro-Mechanical Brake, also called electro-mechanical brake is a mechanical part that stops or decelerates moving parts in a machine. The brake is mainly composed of a brake frame, brake parts and a control device. Some brakes are also equipped with an automatic adjustment of the brake clearance. In order to reduce the braking torque and structure size, the brake is usually installed on the high-speed shaft of the equipment, but large equipment with high safety requirements (such as mine hoists, elevators, etc.) should be installed on the low-speed shaft near the working part of the equipment on.

Kendrion is the largest manufacturers of Electro-mechanical Brake in the world, has a share over 16%. Other players include Altra Industrial Motion, Ogura Industrial, and Mayr, etc. Europe is the largest producer of Electro-mechanical Brake, holds a share

over 20%, followed by North America, Japan and China. In terms of product, Electrically Actuated Braker is the main segment, with a share over 90%. And in terms of application, the largest application is Processing Machinery and Packaging Machinery, followed by Construction Machinery.
