Electrochemical Instrumentation measure the interactions between an electrode and the solution in contact with the electrode. Electrical and chemical transport properties are measured with various methods, which also allow to determine electronic or ionic conductivities and to investigate the elementary processes which determine the transport properties.

Global key manufacturers of electrochemical instrumentation include Thermo Fisher Scientific, Metrohm, Xylem Inc etc. The top 3 companies hold a share about 36%. Asia-Pacific is the largest market, with a share about 37%, followed by North America and Europe with the share about 27% and 26%. In terms of product, pH meters is the largest segment, with a share over 68%. And in terms of application, the largest application is environmental testing, followed by biotechnology and pharmaceutical and academic research.
