The global Electromagnetic Brakes market size is predicted to grow from US\$ 751 million in 2025 to US\$ 896 million in 2031; it is expected to grow at a CAGR of 3.0% from 2025 to 2031.

Electromagnetic brakes are also called Electro-mechanical Brakes or EM brakes. Electromagnetic brake is a mechanical part that stops or decelerates moving parts in a machine. Commonly known as brakes. The brake is mainly composed of a brake frame, brake parts and a control device. Some brakes are also equipped with an automatic adjustment of the brake clearance. In order to reduce the braking torque and structure size, the brake is usually installed on the high-speed shaft of the equipment, but large equipment with high safety requirements (such as mine hoists, elevators, etc.) should be installed on the low-speed shaft near the working part of the equipment on.

The core manufacturers of Electromagnetic Brakes in the world include Regal Rexnord, Kendrion and Ogura Industrial. The top three companies hold about 49 percent of the market. Asia Pacific is the world's largest market for Electromagnetic Brakes with a market share of about 45%, followed by Europe and North America with a market share of 29% and 21%, respectively. In terms of product type, Power off Brake is the largest segment with approximately 92% market share. In terms of application, Machinery is the largest downstream segment, accounting for about 46% of the market share.
