Electromagnetic (EMI) Shielding refers to electronic materials used to meet the needs of reducing radiated interference in electromagnetic interference design.

The main global markets are mainly distributed in Asia-Pacific, North America and Europe. Especially Asia-Pacific, as the largest consumer market, has an unshakable position in this field, occupying 77% of the global market.

The consumption of Electromagnetic (EMI) Shielding has gradually expanded from being used in consumer electronics to being used in communications, national defense and aviation, and even penetrated into various industries such as medicine and agricultural construction. The global consumer electronics application segment has the highest penetration rate, accounting for 52% of the total Electromagnetic (EMI) Shielding demand.

Henkel, Dow and Parker Chomerics are the top 3 players in the world, accounting for 10% of the overall Electromagnetic (EMI) Shielding market.
