Electron beam irradiation processing refers to the physical, chemical or biological effects of the interaction between the electron beam and the substance generated by the electron accelerator, and the purpose of disinfection and sterilization, insecticide inactivation, preservation, extension of shelf life, material modification, etc. Significant advantages such as safety, high efficiency, no pollution, no residue, and no damage to the original properties. It is widely used in many fields such as traditional Chinese medicine, food, medical supplies and equipment, agricultural and side-line products, cosmetics, food and drug packaging materials, material modification and so on.

**Sterilization and Disinfection:** Electron beam irradiation is used for the sterilization and disinfection of medical devices, pharmaceuticals, cosmetics, and other products to eliminate harmful microorganisms and ensure product safety.

**Food Safety and Preservation:** The technology is employed for food irradiation to extend shelf life, control pathogens, and reduce spoilage, enhancing food safety and reducing post-harvest losses.

**Polymer Crosslinking:** Electron beam irradiation is utilized to crosslink polymers, enhancing their mechanical, thermal, and chemical properties. This is important in

industries like automotive, construction, and electronics.

**Waste Reduction and Environmental Benefits:** Electron beam irradiation can help reduce the use of chemical agents for sterilization and food preservation, contributing to environmental sustainability.

**Medical Device Manufacturing:** Electron beam irradiation is used in the manufacturing of medical devices, such as catheters and implantable products, to modify material properties and enhance biocompatibility.

**Regulatory Approval:** The use of electron beam irradiation in various industries is subject to regulatory approvals and standards to ensure safety and efficacy.

**Capital Investment:** Setting up and maintaining electron beam irradiation facilities require significant capital investment, which might limit access for smaller businesses.
