The global Electronic Article Surveillance Security Labels market size is predicted to grow from US\$ 704 million in 2025 to US\$ 1037 million in 2032; it is expected to grow at a CAGR of 5.7% from 2026 to 2032.

Electronic Article Surveillance Security Labels are low-cost, high-volume electronic protection labels used in retail loss prevention, source tagging, open merchandising and item-level merchandise security. They are typically constructed from resonant circuits, antennas, magnetic or acousto-magnetic materials, substrates, pressure-sensitive adhesives, printable facestocks and, in more advanced forms, RFID inlays integrated with EAS functionality. These labels are designed to interact with EAS detection systems at store exits or controlled zones and to trigger an alarm when merchandise has not been properly paid for, deactivated or authorised. Main product forms include RF soft labels, AM soft labels, EM strips, roll labels, sheet labels, food labels, microwave-compatible labels, insertable labels, thermal integrated EAS labels, source tagging labels and RFID+EAS combination labels. Common technical specifications include 8.2 MHz RF labels, 58 kHz AM labels and UHF RFID+EAS dual-technology labels.

Based on bulk procurement economics, conventional RF soft labels are generally positioned in the sub-cent to several-cent range per unit, while AM, speciality food, microwave-compatible and source-tagging labels command higher prices; RFID+EAS combination labels sit at a materially higher price point due to their integrated chip and inlay structure. This report focuses on soft, disposable or integrated labels with EAS detection, alarm, deactivation or EAS-system interoperability functions.

Based on our research, Electronic Article Surveillance Security Labels should be treated

as a consumable and functional label category within the broader retail loss-prevention infrastructure, rather than as a complete EAS system market. The appropriate analytical boundary is therefore centred on soft labels, source-tagging labels and integrated label formats that can be detected, alarmed, deactivated or otherwise recognised by EAS systems. RF and AM labels remain the principal product routes: RF labels are widely used across grocery, general merchandise, footwear and apparel, while AM labels retain strong relevance in food, liquid, foil and other technically challenging packaging environments. As retailers continue to balance open merchandising with theft prevention, source-applied labels, food-specific labels, microwave-compatible labels and integrated thermal EAS labels are becoming more important extensions of the traditional soft-label market.

From a supply-side perspective, the market is structured around global EAS system leaders, specialised label manufacturers, intelligent label and packaging groups, and a long tail of regional suppliers. Checkpoint Systems and Sensormatic Solutions remain central to the global market due to their EAS installed base, retailer relationships and source-tagging capabilities. Hangzhou Century, ALL-TAG, AM Secure/TAGIT, WG Security and Novatron form an important group of specialised suppliers across AM, RF and regional retail security applications. Avery Dennison, Cymmetrik and Hally Labels represent a more packaging- and intelligent-label-oriented route, where EAS functionality is embedded into broader labelling or item-level identification products. The longlist is materially larger than the core formal list because many companies can supply EAS-related labels, but not all have sufficient official evidence, manufacturing scale or product specificity to be treated as core global competitors.

Demand is mainly supported by retail shrink, organised theft concerns, open display formats, self-checkout expansion, source-tagging economics and the need to reduce in-store labour. Grocery, food, cosmetics, personal care, apparel, footwear, books, pharmacy products, small electronics and high-value general merchandise represent the most relevant end-use areas. Compared with hard tags, soft EAS labels are lower in cost, easier to apply at high speed, less intrusive to packaging and better suited to disposable or source-applied protection. Their limitations are equally clear: they are not reusable, require careful performance matching for metal or liquid-rich environments and face substitution risk where RFID-based loss prevention becomes economically viable.

The industry's technology roadmap is not a simple migration from EAS to RFID, but a multi-track evolution. Conventional RF and AM labels will continue to compete on cost, detection performance, deactivation reliability and application flexibility. Speciality EAS

labels will grow in food, chilled products, cosmetics and packaging-integrated formats where standard labels underperform. RFID+EAS combination labels will gain share in apparel, footwear and other categories where retailers can justify the additional cost through inventory visibility, omnichannel fulfilment and shrink reduction. As a result, future competition will be shaped not only by unit price, but by application engineering, source-tagging automation, packaging compatibility, sustainability requirements and integration with broader retail digitalisation systems.

LP Information, Inc. (LPI) ' newest research report, the "Electronic Article Surveillance Security Labels Industry Forecast" looks at past sales and reviews total world Electronic Article Surveillance Security Labels sales in 2025, providing a comprehensive analysis by region and market sector of projected Electronic Article Surveillance Security Labels sales for 2026 through 2032. With Electronic Article Surveillance Security Labels sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Electronic Article Surveillance Security Labels industry.

This Insight Report provides a comprehensive analysis of the global Electronic Article Surveillance Security Labels landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Electronic Article Surveillance Security Labels portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Electronic Article Surveillance Security Labels market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Electronic Article Surveillance Security Labels and breaks down the forecast by Technology Route, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Electronic Article Surveillance Security Labels.

This report presents a comprehensive overview, market shares, and growth opportunities of Electronic Article Surveillance Security Labels market by product type, application, key manufacturers and key regions and countries.

Key Questions Addressed in this Report

What is the 10-year outlook for the global Electronic Article Surveillance Security Labels market?

What factors are driving Electronic Article Surveillance Security Labels market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Electronic Article Surveillance Security Labels market opportunities vary by end market size?

How does Electronic Article Surveillance Security Labels break out by Technology Route, by Application?

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global Electronic Article Surveillance Security Labels Annual Sales 2021-2032
- 2.1.2 World Current & Future Analysis for Electronic Article Surveillance Security Labels by Geographic Region, 2021, 2025 & 2032
- 2.1.3 World Current & Future Analysis for Electronic Article Surveillance Security Labels by Country/Region, 2021, 2025 & 2032

2.2 Electronic Article Surveillance Security Labels Segment by Technology Route

- 2.2.1 RF EAS Labels
- 2.2.2 AM EAS Labels
- 2.2.3 EM EAS Labels
- 2.2.4 RFID+EAS Combo Labels
- 2.2.5 Electronic Article Surveillance Security Labels Sales by Technology Route
 - 2.2.5.1 Global Electronic Article Surveillance Security Labels Sales Market Share by Technology Route (2021-2026)
 - 2.2.5.2 Global Electronic Article Surveillance Security Labels Revenue and Market Share by Technology Route (2021-2026)
 - 2.2.5.3 Global Electronic Article Surveillance Security Labels Sale Price by Technology Route (2021-2026)

2.3 Electronic Article Surveillance Security Labels Segment by Product Form

- 2.3.1 Roll Labels
- 2.3.2 Sheet Labels
- 2.3.3 Insertable Labels
- 2.3.4 Integrated Labels
- 2.3.5 Electronic Article Surveillance Security Labels Sales by Product Form

2.3.5.1 Global Electronic Article Surveillance Security Labels Sales Market Share by Product Form (2021-2026)

2.3.5.2 Global Electronic Article Surveillance Security Labels Revenue and Market Share by Product Form (2021-2026)

2.3.5.3 Global Electronic Article Surveillance Security Labels Sale Price by Product Form (2021-2026)

2.4 Electronic Article Surveillance Security Labels Segment by Tagging Stage

2.4.1 Source Tagging

2.4.2 In-store Tagging

2.4.3 Distribution Centre Tagging

2.4.4 Other

2.4.5 Electronic Article Surveillance Security Labels Sales by Tagging Stage
