A cutting machine can be the most versatile tool in your craft space or classroom, making quick work of decals, stickers, signs, and cards. Die cutting machines are machines that cut shapes out of paper, chipboard, fabric and other materials. Most people who die cut regularly have personal die cutting machines. These machines can sit on top of the crafting table or work space or can be stored in a small area and brought out when needed. Just like any other appliance or tool, there are varieties of brands of die cutting machines, and each differs slightly from the other.

Electronic Die Cutting (Digital die cutting) machines are powered by electricity and are controlled by computer software or cartridges. Digital cutters do not require steel dies because they have a blade inside the machine that cuts the paper or other materials.
