Electronic FFC hot melt adhesive film is a special hot melt adhesive film used for connection and packaging of electronic equipment. FFC is the abbreviation of Flat Flexible Cable (flat flexible cable), also known as flat cable or flexible cable. It is composed of multiple insulated wires arranged in parallel, and has the characteristics of flexibility, thinness and lightness. The electronic FFC hot melt adhesive film plays the role of fixing, insulating and protecting between the FFC connector and the circuit board. It is usually located at the bottom of the FFC connector. Through the characteristics of hot melt adhesive, a reliable bond can be formed between the

connector and the circuit board, ensuring the stability and reliability between the connector and the circuit board. Electronic FFC hot-melt adhesive film has the following characteristics: 1. Hot-melt: Under a certain temperature, the hot-melt adhesive film can be melted and bonded with the connector and the circuit board. 2. Insulation: The hot-melt adhesive film has good insulation properties and can prevent short circuit and leakage of electricity. 3. Anti-vibration and impact resistance: The hot-melt adhesive film can provide additional fixation and protection, making the connector more stable and reliable in vibration and impact environments. 4. High temperature resistance: hot melt adhesive film can maintain stability and reliability in high temperature environment. Electronic FFC hot melt adhesive film is widely used in the connection and packaging of electronic devices, such as mobile phones, tablet computers, TVs, automotive electronics, etc. It provides a simple, reliable and economical solution for connecting and securing between connectors and circuit boards.
