Electronics Adhesive refers to the adhesive for electronic application.

Electronics innovation touches nearly every facet of our lives. such as hybrid vehicles, mobile electronic devices, medical applications, digital cameras, computers, defense telecommunications, and augmented reality headsets, touch nearly every part of our lives. Electronics adhesives are a crucial part of assembling these components, with a range of different adhesive technologies available to address specific application needs.

Adhesives provide a strong bond while protecting components against the damaging effects of excessive vibration, heat, moisture, corrosion, mechanical shock, and extreme environmental conditions. They also offer thermal and electrically conductive properties, as well as UV curing abilities.

As a result, electronics adhesives have successfully replaced many traditional soldering systems. Typical applications where these adhesives can be used in electronics assembly include masking before conformal coating, heat sinks, electric motor applications, potting fiber optic cable connections, and encapsulation.
