According to our LPI (LP Information) latest study, the global Electronic Warfare Systems market size was valued at US\$ 15920 million in 2023. With growing demand in downstream market, the Electronic Warfare Systems is forecast to a readjusted size of US\$ 21450 million by 2030 with a CAGR of 4.4% during review period.

The research report highlights the growth potential of the global Electronic Warfare Systems market. Electronic Warfare Systems are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Electronic Warfare Systems. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Electronic Warfare Systems market.

Electronic warfare (EW) detects, interprets, controls or disrupts signals in the electromagnetic (EM) spectrum, typically radar, radio or infrared transmissions, to protect military assets from potential threats.

Modern military capabilities rely increasingly on the electromagnetic spectrum. War fighters depend on the spectrum to communicate with each other and their commanders, to understand the environment and inform decisions, to accurately identify and engage targets, and to protect them from harm.

North America is forecasted to hold the largest share in the market due to rising insurgencies, territorial disputes, terrorism, and the unrest with other nations, thus

driving the global market upwards till 2026.

Nations like Russia, China, North Korea, and Iran are involved in the act of modernizing their Electronic Warfare equipment in a bid to hold a better share in the market. Acts like these will help foster the growth of the market over the forecasted period.

The segment for electronic support is expected to have the highest growth rate during the forecast period. The rising demand for advanced communication systems and information gathering is of high importance. This makes other applications such as intelligence, surveillance, target acquisition, and reconnaissance (ISTAR), intelligence, surveillance and reconnaissance (ISR), signals intelligence (SIGINT) systems, and other such systems grow with the highest demand. The usage of unmanned aerial vehicles or drones is also rising in recent years, which is also driving market demand. Report data showed that 52% of the Electronic Warfare Systems market is Electronic Support in 2020.

Airborne application segment is forecasted to be the largest segment in the market, with a market share of over 56% globally in 2020. Increasing investments being carried out in the segment by the majority of the leading market players will be the major factor for the growth of the application segment.
