The global Electrostatic Spray Guns market size is predicted to grow from US\$ 967 million in 2025 to US\$ 1378 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

In 2025, global production of Electrostatic Spray Guns reached 520,000 units, with an average selling price of USD 1,900 per unit, total production capacity of 600,000 units, and a gross margin of 38%.

Electrostatic Spray Guns are coating application devices that use high-voltage electrostatic principles to electrically charge coating particles during spraying, enabling them to be uniformly attracted to the surface of the target object under an electric field. By leveraging electrostatic attraction, these spray guns significantly improve paint transfer efficiency, reduce overspray and material waste, and enhance coating uniformity and adhesion. They are widely used in automotive manufacturing, industrial coating, metal surface treatment, furniture, and appliance finishing.

The global Electrostatic Spray Guns market is primarily driven by automotive manufacturing, auto parts coating, industrial metal processing, construction machinery, furniture, and home appliance industries. As environmental regulations become increasingly stringent and requirements for higher coating efficiency and lower VOC emissions intensify, electrostatic spraying technology continues to gain strong market acceptance due to its high transfer efficiency and material-saving advantages.

The Asia-Pacific region, particularly China, Japan, and Southeast Asia, represents the largest production and consumption base, benefiting from large-scale manufacturing activities and the rapid adoption of automation in industrial coating processes. North

America and Europe, meanwhile, focus more on high-end electrostatic spray systems, automated production lines, and robotic spraying applications. Overall, the market is undergoing a gradual upgrade toward automation, intelligence, and energy-efficient solutions, with manual spray guns and automated systems developing in parallel.
