The global Eletriptan Tablets market size is predicted to grow from US\$ 144 million in 2025 to US\$ 180 million in 2032; it is expected to grow at a CAGR of 3.4% from 2026 to 2032.

Eletriptan Tablets are oral solid dosage forms containing eletriptan hydrobromide as the active ingredient. They belong to the second-generation triptan class and are mainly used for the acute treatment of migraine attacks with or without aura in adults. The mainstream commercial strengths are 20 mg and 40 mg, while 80 mg is available in a limited number of markets. On a finished-dose basis, the upstream supply chain mainly includes eletriptan hydrobromide API, oral solid-dose excipients such as lactose, microcrystalline cellulose, croscarmellose sodium, and magnesium stearate, as well as blister packaging materials, inserts, cartons, and formulation manufacturing services. Downstream customers mainly include originator and generic marketing authorization holders, hospital pharmacies, retail pharmacy chains, e-prescription fulfillment platforms, pharmaceutical wholesalers, and neurology or headache-care channels. Given that the product is already off-patent and the global market is primarily characterized by mature generic competition while still retaining certain specialty prescription-drug attributes, global nominal capacity of Eletriptan Tablets is estimated at about 82.4 million tablets in 2025, with actual sales volume of about 63.56 million tablets and an average ex-factory price of around US\$2.32 per tablet. Affected by API costs, formulation expenses, market access structure, regional pricing systems, and downstream bargaining power, the overall industry gross margin is typically estimated at 31%-45%.

United States market for Eletriptan Tablets is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
