According to our LPI (LP Information) latest study, the global Elevator Positioning Systems market size was valued at US\$ million in 2023. With growing demand in downstream market, the Elevator Positioning Systems is forecast to a readjusted size of US\$ million by 2030 with a CAGR of % during review period.

The research report highlights the growth potential of the global Elevator Positioning Systems market. Elevator Positioning Systems are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Elevator Positioning Systems. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Elevator Positioning Systems market.

An elevator positioning system includes an optical tape, optical tape clips, and a sensor. The optical tape clips are mountable to various structures within the hoistway. A crossbar of the optical tape clips is located between a sensor and optical tape such that the sensor detects an interruption in the optical tape and signals the detection to an elevator controller. Another elevator positioning system includes a sensor and a reflector clip assembly. The reflector clip assemblies are mountable to various structures within the hoistway.

According to data released by the National Bureau of Statistics, China's elevator production in 2022 was 1.455 million units, which was down 5.8% compared to last year. After years of development, China has become the world's largest elevator

producer and consumer. More than 70% of the world's elevator manufacturing business were in Chinese mainland, and 60%-65% of the world's elevators sold in the Chinese market. According to data from the China Elevator Association, by the end of 2022, the number of elevators registered in operation in China has reached 9.65 million, and more than 15,000 elevators have been installed after acceptance.
