North America is expected to account for the largest share of the global market by 2029. This can be attributed to the well-developed infrastructure and availability of elevators in the region, thereby increasing the demand for elevator running cables. The European region is considered to be one of the regions with the most growth prospects, with a high increment of elevator accompanying cables. Due to the large population and the popularity of modern elevators in the Asia-Pacific region, it is estimated that by 2029, the Asia-Pacific region will be one of the fastest-growing regions in the global market with a high growth rate.
