Emergency light pole is a kind of light pole equipment installed in public places or buildings, mainly used for emergency lighting and guidance. One of the development trends of emergency light poles is the adoption of LED lighting technology. LED has the advantages of high brightness, low energy consumption, long life and environmental protection, and gradually replaces traditional incandescent or fluorescent lamps as the lighting source for emergency light poles. LED lighting can not only provide sufficient lighting effects, but also has lower energy consumption and maintenance costs.
