Emergency marine air compressors are essential components for marine vessels, as they can prove to be lifesavers in events like power outage or power failure. This type of compressor is designed to provide the necessary energy to kick-start the primary and auxiliary engines. Without an emergency air compressor onboard, the crew would struggle tremendously in a crisis, putting theirs and the vessel's safety in jeopardy. While it is difficult to predict all possible risks on the open seas, having an emergency marine air compressor onboard drastically reduces the chances of an avoidable incident.
