E-stop (emergency stop) is a simple, highly visible button designed to shut down operations on heavy and/or dangerous equipment.

Used to save lives in industrial operations, E-stops shut down equipment immediately. E-stops are found in industries such as agriculture, manufacturing, engineering, power production and in vehicles, amusement park rides and other heavy equipment. In some cases, using an E-stop can require work to restart equipment, affecting production. The devices can even damage the equipment. Because of the potential for creating extra costs or affecting productivity, E-stops are not used to stop equipment for production problems that do not affect safety.
