Emissions testing service is a process that measures the amount of pollutants emitted by a vehicle's exhaust system. It is typically required by government agencies to ensure that vehicles meet certain environmental standards and do not contribute excessively to air pollution. During the emissions testing service, a vehicle is subjected to various tests and inspections to determine the levels of pollutants such as carbon monoxide, nitrogen oxides, and hydrocarbons being emitted. This service helps identify vehicles that are not in compliance with emission regulations and may require repairs or maintenance to reduce their pollution levels.
