The global Emulsion Polymers market size is predicted to grow from US$ 35930 million in 2025 to US$ 41400 million in 2031; it is expected to grow at a CAGR of 2.4% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Polymer Emulsions are monomers dissolved in water. They are also known as waterborne solvent because of their high water content. They are one of the fastest growing categories of specialty chemicals in the world. Polymer Emulsions have superior usability and safety standards. Polymer emulsions also have better recyclability and lifespan when compared to solvent-borne polymers.

In this report, the polymer emulsion market is segmented on the basis of types into acrylics, vinyl acetate polymer, SB Latex, polyurethane dispersion, and others.

The top 5 key players of the global Polymer Emulsions include BASF, Dow, Trinseo(Styron), Akzonobel and Wacker, with about 33% market shares. Geographically, Europe is the largest consumption place, with a consumption market share nearly 29%. Following Europe, North America is the second largest consumption place with the consumption market share of 31%.
