The global Enclosed Motor Starters market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

By placing the most advanced motor control technology “in a box,” you get a readily available package to meet all your application needs for motor protection and control. Protecting the performance of motors is a critical priority and one of the best ways to do so is with UL listed and cUL certified SIRIUS Enclosed Motor Controllers.

The motor starter market is expected to witness steady growth in the coming years. This can be attributed to several factors such as increasing industrial automation, rising demand for motor-driven equipment in various industries, and government initiatives promoting energy efficiency. The industrial automation sector is one of the primary drivers of the motor starter market. With the increasing adoption of automation technologies in industries such as manufacturing, oil and gas, and mining, the demand for motor-driven equipment is also rising. Motor starters play a crucial role in controlling the operation and performance of these motors, making them an essential component in industrial automation systems. Governments around the world are focusing on promoting energy efficiency and reducing carbon emissions. Motor starters are energy-efficient devices that help in reducing power consumption and optimizing motor performance. As a result, there is a growing demand for energy-efficient motor starters, especially in sectors like HVAC (heating, ventilation, and air conditioning) and water treatment.
