Technological advances in this field have enabled better navigation, allowing dentists to provide safer and more reliable procedures. The fillings category is also expected to grow at a significant rate owing to rising spending on dental care, surge in cavities cases, and development of innovative filling devices. Likewise, the grooming and cleaning category is expected to advance this decade owing to technological advancements, especially in the development of suitable combinations of irrigation equipment and other instruments. Some of the major factors driving the growth include growing population, increasing investment in dental R&D, preference for root canal treatment over implantology, and rising number of dental clinics and specialists.
