The global Endpoint Security Response (EDR) System market size is predicted to grow from US\$ 459 million in 2025 to US\$ 712 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

Endpoint Security Response (EDR) is an endpoint security solution that integrates detection, defense, and response. By deploying lightweight agents on endpoint devices, it collects real-time behavioral data on processes, networks, and files. Utilizing behavioral analysis and machine learning technologies, it identifies known and unknown threats and responds automatically or manually, achieving a closed-loop protection system of 'monitoring-analysis-response-attribution.' This effectively addresses advanced threats such as ransomware and APT attacks. The industry's gross profit margin is approximately 45-60%.
