Abstracts

The global Enoxolone market size is predicted to grow from US\$ 21.75 million in 2025 to US\$ 28.34 million in 2032; it is expected to grow at a CAGR of 4.0% from 2026 to 2032.

Enoxolone is a compound derived from licorice root used in dermatology for its anti-inflammatory and skin-soothing properties, identified by CAS 471-53-4.

The upstream base is licorice-root-derived phytochemical production, typically involving extraction, hydrolysis or conversion from glycyrrhizic acid, purification, crystallization, specification control, and documentation for the target market. In the current market, global production is around 78 ton, with an average selling price of about 285 USD per kg EXW basis. Demand is now led by cosmetic skin care, dermatology medicines and gastrointestinal medicines, followed by oral-care products, food or flavor specialty uses, tobacco specialty uses and research reference demand. Procurement differs by end market. Pharmaceutical buyers require pharmacopoeial identity, GMP documentation, CEP/DMF/JDMF/T-DMF or comparable registration support, impurity control and batch traceability. Cosmetic and oral-care buyers focus more on INCI identity, appearance, solubility behavior, dosage recommendation, skin-soothing claims, anti-inflammatory positioning and formulation compatibility. Food/flavor and tobacco uses are smaller and more price-sensitive.

Top 5 API suppliers control approximately 48 percent of global revenue. China is the main supply-side. Growth from 2026 to 2032 should be stronger than the API-only case because cosmetic skin care, sensitive-skin products, oral care, botanical actives and natural-origin functional ingredients broaden the addressable demand. Key constraints are licorice-root availability and quality consistency, purification yield, impurity management, documentation cost.

LP Information, Inc. (LPI) ' newest research report, the "Enoxolone Industry Forecast" looks at past sales and reviews total world Enoxolone sales in 2025, providing a comprehensive analysis by region and market sector of projected Enoxolone sales for 2026 through 2032. With Enoxolone sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Enoxolone industry.

This Insight Report provides a comprehensive analysis of the global Enoxolone landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Enoxolone portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Enoxolone market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Enoxolone and breaks down the forecast by Purity, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Enoxolone.

This report presents a comprehensive overview, market shares, and growth opportunities of Enoxolone market by product type, application, key manufacturers and key regions and countries.

Segmentation by Purity:

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Enoxolone Annual Sales 2021-2032
 - 2.1.2 World Current & Future Analysis for Enoxolone by Geographic Region, 2021, 2025 & 2032
 - 2.1.3 World Current & Future Analysis for Enoxolone by Country/Region, 2021, 2025 & 2032
- 2.2 Enoxolone Segment by Purity
 - 2.2.1 Purity ≥98%
 - 2.2.2 Purity 97%
