Enteric capsule means capsule can't be dissolved in gastric juice, but can be disintegrated in intestinal juice and release active ingredients. Since some kinds of medicine have strong stomach irritation or injury effects while they have no harm to intestines, these kinds of medicine should be made into enteric capsule. The shell of enteric capsule is added with special pharmaceutical polymers or accepts special treatment, so that the capsule can't be dissolved in gastric juice, but can be disintegrated in intestinal juice and release active ingredients.
