The global Enterprise A2P SMS market size is predicted to grow from US\$ 22490 million in 2025 to US\$ 21400 million in 2031; it is expected to grow at a CAGR of -0.8% from 2025 to 2031.

Enterprise A2P SMS is also called enterprise or professional SMS. Businesses can use it in several technical modes to communicate with consumers, authenticate users of online services, or deliver time-sensitive alerts. In all the cases, communication is initiated from a business application, and not an individual's mobile phone, as is the case with P2P SMS. The A2P SMS Messaging industry can be broken down into several segments, Marketing A2P SMS, Verification Code A2P SMS, Industry Application A2P SMS.

Currently, the major global players in the industry include Twilio, Infobip, Sinch, MessageBird, and Tanla, among others. It is expected that competition in the industry will intensify over the next few years. Large international companies primarily expand their market share through acquisitions. For example, Twilio and Sinch. However, the industry has a relatively low concentration, with the top 10 global companies accounting for 34% of the market share in 2023.

From a regional perspective, the North American market is the largest, accounting for approximately 27% of the global market in 2023. As market maturity continues to increase, along with the addition of new customers and the continuous renewal of existing customers, the usage of A2P SMS is expected to grow gradually. However, due to intense competition among companies and strategies such as renewal discounts for

existing customers, QYR analysts predict that the price of A2P SMS will decline rapidly. In mature regions, the market size is expected to show a certain downward trend.

In terms of product offerings, SMS verification codes are a significant component of A2P SMS. With the clear trend in the app market, SMS verification codes represent a new growth point. From the perspective of product market applications, banking, financial services, and insurance (BFSI) account for the largest share of the market. In 2023, BFSI accounted for 67.85% of the global A2P SMS market. Other applications, including e-commerce, retail, travel and leisure, government agencies, and transportation and logistics, collectively accounted for 32.15% of the global market share.
