The global Enterprise Resource Planning (ERP) Package market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

An ERP (Enterprise Resource Planning) Package is a system that integrates and manages the various operations of a company. ERP packages provide functions such as accounting management, sales management, logistics management, production management, and human resource and payroll management on a single system platform, enabling the centralization of information within a company. This facilitates information sharing and business collaboration between departments, improving operational efficiency and speed.

In addition, ERP packages standardize business processes, reducing the number and variation of employees, and contributing to improvements in quality and costs. Furthermore, management can make accurate decisions because they can monitor the status of each department and company-wide performance in real time.
