Enzymes are known to be the biological catalyst that enhances any process. With the rise of health consciousness and gym enthusiasts, consumers are looking for fast-performing and more efficient plant-based protein supplements. Enzymes work well for both animal and plant proteins. When combined with proper post-workout protein intake, many enzyme-based plant proteins are shown in a clinical study to enhance body structure and strength. Additionally, avoiding chemical additives in products is a major trend in some countries due to which producers in certain cases, uses enzymes during processing which allows for the reduction or even removal of any or all chemical additives, which can increase enzyme-based protein product quality.
