An EOD Bomb Disposal Suit is specialized body armor designed to protect bomb disposal personnel from the blast effects of explosive devices. These suits are constructed using layers of high-strength materials such as Kevlar, ballistic nylon, and foam to absorb and mitigate the impact of shrapnel, heat, and pressure waves. EOD Bomb Disposal Suits typically include a helmet with a face shield, torso protection, and coverings for the limbs, providing comprehensive protection while allowing some degree of mobility and dexterity. They are equipped with features such as built-in communication systems, cooling systems, and quick-release mechanisms for emergency removal. EOD Bomb Disposal Suits are essential for ensuring the safety of EOD technicians while they handle and neutralize explosive threats. The product has a sales volume of approximately 6,000 units per year, with a price of approximately US\$13.5K per unit.

The upstream of EOD Bomb Disposal Suits includes suppliers of high-performance protective materials and components such as aramid fibers, ultra-high-molecular-weight polyethylene fibers, blast-resistant composite plates, ballistic fabrics, visors, communication systems, cooling units, and electronic monitoring modules. These materials and components are integrated by specialized protective equipment manufacturers through design, testing, and assembly processes to produce complete EOD Bomb Disposal Suits that provide protection against blast overpressure, fragmentation, and thermal hazards. Downstream, EOD Bomb Disposal Suits are primarily procured and used by military explosive ordnance disposal units, police bomb

squads, counter-terrorism teams, and public security agencies, as well as specialized security service providers responsible for handling explosive threats and hazardous devices in defense, law enforcement, and critical infrastructure protection environments.
