The global EOD / Defense Robots market size is predicted to grow from US\$ 21082 million in 2025 to US\$ 52534 million in 2032; it is expected to grow at a CAGR of 14.0% from 2026 to 2032.

In 2025, global EOD / Defense Robots production reached approximately 0.14 million units, with an average global market price of around US\$ 150,000 per unit. Annual production capacity is 0.2 million units. Gross Profit Margin: 39%. EOD/Defense robots are unmanned ground systems designed for bomb disposal, reconnaissance, surveillance, and tactical support in high-risk military or security environments, enabling operators to detect, neutralize, or investigate explosive threats and hazardous situations from a safe distance. The EOD/Defense robotics industry chain includes upstream suppliers of critical components such as sensors (EO/IR cameras, LiDAR, radar), ruggedized computing chips, batteries, and precision actuators; midstream integrators and manufacturers that design and assemble EOD robots, integrating mobility platforms, robotic arms, and autonomous control systems; and downstream end-users including military forces, homeland security agencies, and bomb disposal units, often procured through defense contractors and long-cycle government procurement programs. This segment is fundamentally driven by mission-critical reliability rather than cost or scale, making it a high-barrier, high-margin industry where innovation is led by defense needs.

United States market for EOD / Defense Robots is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
