EPDM composite rubber floor mat is a floor paving material made of EPDM rubber (EPDM) as the main raw material through a multi-layer composite process. It combines the weather resistance, corrosion resistance, UV resistance of EPDM rubber with the elasticity and wear resistance of rubber, and has the characteristics of bright colors, rich patterns, good anti-slip performance, aging resistance, and easy cleaning. EPDM composite rubber floor mats are widely used in floor paving in kindergartens, schools, parks, playgrounds, stadiums and other places. They can provide children, teenagers and adults with a safe, comfortable and beautiful sports and leisure environment. At the same time, their good environmental protection performance and weather resistance also ensure the long-term service life of the floor mat.
