The global EPDM Rubber Hose (Ethylene-Propylene-Diene Monomer) market size is predicted to grow from US\$ 2788 million in 2025 to US\$ 4836 million in 2032; it is expected to grow at a CAGR of 8.2% from 2026 to 2032.

EPDM Rubber Hose is a flexible hose primarily made from Ethylene-Propylene-Diene Monomer (EPDM) rubber, manufactured through processes such as mixing, extrusion, and vulcanization. It features high temperature resistance, aging resistance, ozone resistance, chemical resistance, and excellent elasticity, and is widely used in automotive cooling systems, industrial fluid transport, construction water supply and drainage, and air conditioning systems. In 2025, global EPDM rubber hose production reached approximately 1.14 B meters, with an average global market price of around US\$ 2.50 per meter. Annual production capacity is 1.2 B meters. Gross Profit Margin: 18%. The industry chain of EPDM rubber hoses is relatively mature and well-structured. The upstream mainly consists of raw material suppliers, such as EPDM rubber, fillers, reinforcing fibers, and various chemical additives, which directly affect the hose's heat resistance, aging resistance, and elasticity. The midstream involves the manufacturing process, including mixing, extrusion, and vulcanization, with leading companies typically mastering high-precision extrusion and pressure control technologies. The downstream applications are wide-ranging, covering automotive industry, construction projects, chemical pipelines, air conditioning refrigerant systems, etc., with demand relatively stable and showing incremental growth alongside industry expansion. EPDM rubber hoses offer advantages such as high temperature resistance, UV resistance, and chemical corrosion resistance, making them well-suited for automotive cooling systems and industrial fluid transport applications. I believe that future market opportunities will primarily lie in eco-friendly and energy-saving hoses as well as high-performance customized hoses, especially with the rapid development of new energy vehicles and

green buildings, which will drive demand for high-weathering, high-pressure EPDM hoses. In addition, as manufacturers worldwide enforce stricter quality standards, the competitive barrier for high-quality EPDM hoses will further increase.

United States market for EPDM Rubber Hose (Ethylene-Propylene-Diene Monomer) is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for EPDM Rubber Hose (Ethylene-Propylene-Diene Monomer) is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
