EPE pearl cotton is a non-cross-linked closed-cell structure, also known as polyethylene foam cotton, which is a new type of environmentally friendly packaging material. It is composed of numerous independent bubbles produced by physical foaming of low-density polyethylene resin. It overcomes the shortcomings of ordinary foam rubber that is fragile, deformed, and has poor recovery. It has many advantages such as waterproof and moistureproof, shockproof, sound insulation, heat preservation, good plasticity, strong toughness, recycling, environmental protection, strong impact resistance, etc. It also has good chemical resistance.
