2019-nCoV is a new virus-borne which can cause infectious disease. The virus is mainly transmitted through respiratory tract droplets and close contact with two transmission routes. Patients infected with the new coronavirus will have varying degrees of symptoms, such as fever and cough. Exacerbations can cause pneumonia and even death. As of now, new coronaviruses are raging. According to statistics from the World Health Organization, about 180 countries worldwide are infected with new coronaviruses, and the number of infected people is about 300,000.

Medical anti-epidemic protective products played a huge protective role in this virus infection. Hospitals and individuals need medical anti-epidemic protective products from virus infection, and the demand for medical anti-epidemic protective products has surged worldwide. However, due to limited production conditions and insufficient production capacity, most countries cannot guarantee the continuous supply of medical epidemic prevention supplies and require large imports. China, as a large production country, with the stabilization of the domestic epidemic situation and the resumption of production by various production enterprises, medical and epidemic prevention supplies can be exported on a large scale.

This article mainly explains China's latest export policy of medical and anti-epidemic protective products, compiles a list of Chinese medical and anti-epidemic protective products suppliers, and details the specific suppliers in terms of production capacity, export qualifications, export agents. Contact information is also offered, so that health departments at all levels, hospitals and non-profit organization in all affected countries can obtain the procurement information of medical supplies in time to fight the epidemic.

According to the actual situation, we divide the medical and epidemic prevention products into the following categories: 2019-nCoV Detection Kit, Medical Masks, Medical Protective Clothing, Medical Protective Shoe Covers, Medical Rubber Gloves, Oximeters, Ventilator, Monitors. These products are necessary and scarce for countries to fight the epidemic.
