The report requires updating with new data and is sent in 48 hours after order is placed.

According to our LPI (LP Information) latest study, the global eReader market size was valued at US$ 772.6 million in 2023. With growing demand in downstream market, the eReader is forecast to a readjusted size of US$ 815.7 million by 2030 with a CAGR of 0.8% during review period.

The research report highlights the growth potential of the global eReader market. eReader are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of eReader. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the eReader market.

An e-reader, also called an e-book reader or e-book device, is a mobile electronic device that is designed primarily for the purpose of reading digital e-books and periodicals.

Any device that can display text on a screen may act as an e-reader, but specialized e-reader designs may optimize portability, readability (especially in sunlight), and battery life for this purpose. A single e-reader is capable of holding the digital equivalent of hundreds of printed texts with no added bulk or measurable mass.

This report will cover the production and revenue by manufacturer of e-reader as well as the specs from the OEM terminal. The investigated e-readers are based on E-ink and low cost TFT LCD technology with price spanning from 20 USD to over 300 USD.
