Abstracts

The global ERP Project Support market size is predicted to grow from US$ 67070 million in 2025 to US$ 121940 million in 2031; it is expected to grow at a CAGR of 10.5% from 2025 to 2031.

ERP Project Support refers to the assistance, resources, and services provided to ensure the successful planning, implementation, and ongoing operation of an Enterprise Resource Planning (ERP) system within an organization. ERP systems are comprehensive software solutions that integrate various business processes, such as finance, human resources, supply chain management, and customer relationship management, into a single, unified platform. Implementing an ERP system is a complex and resource-intensive endeavor, and ERP project support is essential to navigate the challenges and achieve the desired outcomes.

Many organizations are moving away from on-premises ERP systems and opting for cloud-based ERP solutions. This trend requires ERP project support teams to adapt their methodologies and expertise to accommodate cloud deployments, including data migration, integration, and security considerations.

LPI (LP Information)' newest research report, the “ERP Project Support Industry Forecast” looks at past sales and reviews total world ERP Project Support sales in 2024, providing a comprehensive analysis by region and market sector of projected ERP Project Support sales for 2025 through 2031.
