Erythropoietin (EPO)/hematopoietin is a glycoprotein hormone that triggers production of red blood cells in the bone marrow through erythropoiesis. Erythropoietin drug was developed with the objective to treat anemic conditions caused from end stage renal disease (ESRD) disease treatments and dialysis procedures. Followed by ESRD anemic condition, EPO drugs have gained approvals for chemotherapy-induced anemia. After post-abbreviated new drug application (ANDA) approvals and high success rate of EPO applications for chemotherapy-induced anemia, original biopharmaceutical companies turned their attention to another form of induced anemia, namely ART-induced anemia (among HIV patients).

The global Erythropoietin (EPO) Treatment market size is projected to grow from US\$ 10530 million in 2024 to US\$ 14860 million in 2030; it is expected to grow at a CAGR of 5.9% from 2024 to 2030.

With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Erythropoietin (EPO) Treatment.

Rise in prevalence of anemic conditions induced from end stage renal disease treatment, chemotherapy, and antiretroviral treatment (ART) is the primary factor that propels growth of the erythropoietin market. Hence, rise in number of treatment cycles for chemotherapy and increase in incidences of end stage renal diseases (dialysis) has increased demand for EPO. Side effects associated with EPO including arterial hypertension, iron deficiency, and influenza-like syndrome and longer duration of EPO treatment (4-6 weeks) restrain growth of the erythropoietin drugs market. In addition, rise in trends of commercialization for erythropoietin biosimilars, readily available reimbursements, favorable government regulations, and increase in level of awareness regarding benefits of EPO therapeutics boost growth of the erythropoietin drugs market.

This report presents a comprehensive overview, market shares, and growth opportunities of Erythropoietin (EPO) Treatment market by product type, application, key manufacturers and key regions and countries.
